

REMARKS

In the Office communication, the examiner allowed claims 1-33 and 47-80, but objected to the specification of the disclosure because the first line was not amended to incorporate the child reissue application. 37 CFR 1.177 was cited. This is a rule pertaining to multiple reissue applications. The present application is the only reissue application in the patent family. Applicant submits herewith both a corrected marked-up version of paragraph [0001] on page 1 and a replacement paragraph [0001] of the specification which Applicant hopes is responsive to the Examiner's objection, and if not that the Examiner will contact the undersigned.

Furthermore, Applicant submits a corrected reissue oath/declaration which now identifies at least one error which is relied upon to support the reissue application.

With these formal requirements met, Applicant believes that in the application is now in condition for allowance.

Respectfully submitted,

Date: July 11, 2006
